OUR FOUNDER & VISIONARY

SHRI DAYANAND AGARWAL JI

VISION

Our vision is to foster a society of individuals capable of progressive thinking, creating and initiating positive change in the social, economic and cultural fabric thus making a strong impact on the global community through knowledge, understanding and attitude.

MISSION

We aspire to nurture individual talents and abilities by empowering all children, to help develop them into relatively disciplined and dynamic leaders of the future. These children will go on to become active global citizens contributing richly to our nation and the world. Our responsibility is to raise them as independent, responsible, resourceful and successful individuals with high self-esteem and confidence.

Raising Future-Ready Children – Life Skills That Matter Most Today

In an ever-evolving world, success is no longer defined by grades alone. At Edify Education, we believe the true measure of education lies in a child's ability to think critically, collaborate confidently, and adapt with resilience. As educators and parents, our shared goal must be to raise future-ready children—individuals who are not only academically sound but also emotionally strong, socially aware, and equipped with essential life skills.

Today, life skills such as empathy, decision-making, communication, and adaptability are just as crucial as literacy and numeracy. Whether it's managing emotions, resolving conflicts, or leading a team, these skills empower children to thrive in school and in life.

At Edify, our 3C curriculum-Concept, Competence, and Character-has been purposefully designed to nurture these dimensions. From experiential learning and student-led initiatives to role plays, community projects, and collaborative problem-solving, we create real-world contexts for children to build these skills every day.

Parents too play a vital role. When schools and families work together, we create an ecosystem where children grow into confident, compassionate, and capable individuals-ready to face the uncertainties of tomorrow with courage and clarity.

Let us continue to shift our focus from "what children know" to "who they are becoming." Because in the end, the most valuable lessons are those that prepare them for life-not just for exams.

Editor Speaks...

Greetings, Trailblazers of Edify!

As we unveil the first edition of EdiPrints for the academic year 2025–26, we do so with immense pride and renewed enthusiasm. The corridors of Edify are once again buzzing with fresh energy, new beginnings, and the unwavering spirit of excellence that defines our learning community. While we embark on this new journey, it is equally important to celebrate the milestones we've crossed-and the most shining one among them is the outstanding performance in the Board Examinations of 2024–25. Our students have truly outdone themselves, securing remarkable results and bringing laurels to the school and their families. Their achievements stand as a proud reflection of not just their own hard work and perseverance, but also of the collective efforts of our visionary educators and the unwavering support of our parent community. The synergy between

home and school continues to be one of our strongest pillars, enabling our children to thrive academically, emotionally, and socially.

This edition also showcases the creative brilliance and academic projects of our learners, who have displayed their talents across various domains-from science explorations and artistic creations to impactful social initiatives. Their work is a testament to how world-class pedagogical practices, implemented across Edify Schools, are shaping students into curious thinkers, confident communicators, and compassionate individuals.

At the core of our philosophy lies the 3C Curriculum, integrated with global best practices and future-ready skills. Whether it's AI-integrated classrooms, experiential learning modules, or interdisciplinary projects, Edify continues to push the boundaries of what a modern education can look like.

As you flip through these pages, you'll witness not just achievements, but stories—of growth, teamwork, and transformation. May this edition inspire every Edifian to dream boldly, act purposefully, and keep learning with joy.

Here's to another year of innovation, collaboration, and excellence. Happy reading!

Warm regards,
Editor – EdiPrints

Academic Year 2025–26

Celebrating Excellence: A Moment of Pride for the Edify Family

MDN Edify Education joyfully congratulates the brilliant students, dedicated staff, visionary school leaders, and supportive parents on the outstanding performance in the CBSE board examinations. This remarkable achievement is a testament to the collective effort, perseverance, and passion for learning that defines the Edify community.

To our esteemed school management and Principals—your unwavering commitment to academic excellence and holistic development has laid a strong foundation for success. Your leadership fosters an environment where students are encouraged to dream big, work hard, and achieve greatness. This year's exceptional results reflect your dedication to nurturing future leaders and innovators.

A special round of applause goes to our incredible teachers and staff, whose tireless efforts, guidance, and mentorship have been instrumental in shaping these achievements. Your patience, expertise, and belief in every student's potential have made this success possible.

To the parents—your unwavering support, encouragement, and trust in the Edify vision have played a pivotal role in this journey. Your partnership with the school has empowered students to strive for excellence with confidence and determination.

Most importantly, we celebrate our shining stars—the students! Your hard work, discipline, and intellectual curiosity have brought immense pride to the Edify family. These outstanding results are not just a reflection of academic brilliance but also of your resilience and commitment to growth. You have set a new benchmark, inspiring others to aim higher.

Recognizing Excellence: Our top achievers have been honored with well-deserved awards, including cash prizes, trophies, and certificates, celebrating their dedication and success. Each accolade symbolizes the culmination of their relentless efforts and the bright future ahead.

This milestone is more than just academic success—it is a celebration of teamwork, perseverance, and the relentless pursuit of knowledge. As we applaud today's achievements, we also look forward to even greater accomplishments in the years to come.

Once again, congratulations to all students, teachers, parents, and leaders! May this success be the beginning of many more milestones in your journey of learning and growth.

Here's to reaching new heights together!

Parents: The Heartbeat Behind Every Child's Success

Every child's success story is written not just in classrooms, but also at home—with parents playing a quiet yet powerful role in shaping their journey. At Edify, we truly believe that education is a shared effort, and this belief came to life once again with our recent board results. Our students performed exceptionally well, bringing pride not only to the school but immense joy to their families. But behind every high score and every milestone, there was a parent cheering, guiding, and believing in their child's abilities.

Whether it was helping with revision late at night, offering words of comfort during stressful times, or simply being there to listen, our parents have been the strongest pillars of support. Their involvement has been constant—through school meetings, home routines, regular follow-ups, and most importantly, through emotional encouragement. They celebrated small wins, reassured during setbacks, and stood by their children with unshakable faith.

True educational success happens when schools and families walk hand in hand. And at Edify, we are incredibly grateful for the trust, time, and partnership we share with our parent community. Their role in creating a positive, balanced, and motivating environment at home has been key to the confidence and performance our students displayed. These achievements are not just academic victories—they are reflections of love, dedication, and teamwork between parents, teachers, and children.

In today's world, where students face growing academic demands, social challenges, and digital distractions, the presence of a supportive parent can make all the difference. It's not about perfection—it's about presence. A parent's quiet reassurance, active listening, and consistent encouragement give children the emotional strength to aim higher and work harder.

To all the parents who have stood behind their children like a rock—you are the unsung heroes of this journey. Your belief, patience, and involvement made all the difference. At Edify, we celebrate your role and thank you for being such an integral part of our journey toward educational excellence. Together, we continue to raise children who are not only academically strong but also emotionally grounded and future-ready.

MDN EDIFY EDUCATION APPLAUDS SCHOOLS FOR EXCELLENT CBSE GRADE X RESULTS

The CBSE results for 2024–25 have marked a proud moment for the Edify Group of Schools, with students achieving their best-ever performance in Grade 10. In recognition of this milestone, the MDN Edify Head Office has awarded trophies to top-performing students.

Additionally, cash rewards totalling ₹ 80,000 were presented to those who secured the 1st, 2nd, and 3rd All India Edify Rankings, celebrating their dedication and excellence.

This achievement reflects Edify’s commitment to nurturing student success and honouring hard work. The Head Office reaffirms its promise to continue recognising and rewarding students who bring pride to their school, families, and themselves.

Congratulations to all achievers—your success sets a shining example for others to follow!

Congratulations

MDN EDIFY EDUCATION APPLAUDS SCHOOLS FOR EXCELLENT CBSE GRADE XII RESULTS

The CBSE Grade 12 results for the academic year 2024–25 have brought immense joy and pride to the Edify Group of Schools. Our students have delivered outstanding results, marking a perfect conclusion to their school journey and opening the doors to exciting new beginnings.

To acknowledge this remarkable feat, the MDN Edify Head Office honoured the toppers with trophies. Furthermore, cash prizes amounting to 47,000 were awarded to students who secured the 1st, 2nd, and 3rd All India Edify Rankings—recognising their excellence and perseverance.

These young achievers now step into a new phase of life—college, careers, and chasing dreams. Their success is a testament to their dedication and the strong foundation built during their years at Edify.

The Head Office will continue to celebrate such milestones and support students in their future pursuits. As our Grade 12 students embark on new journeys, we wish them success, courage, and endless opportunities.

Congratulations to all achievers—your journey has just begun, and the future is yours to shape!

Teaching the Heart Through Language: The Unseen Magic of Words

“Words are, in my not-so-humble opinion, our most inexhaustible source of magic.” – Albus Dumbledore

In a world that's racing ahead with technology, AI, and instant communication, what often gets left behind is the human connection. As an English Educator at Edify World School Shamshabad, I believe that the English classroom remains one of the few sacred spaces where thoughts are explored, feelings are expressed, and voices are truly heard.

Teaching English is more than correcting grammar or analysing literary texts—it's about shaping perspectives, building empathy, and empowering young minds to communicate with conviction. It is through stories, poems, and discussions that our learners begin to understand not only language, but life.

At Edify, we do not merely teach the curriculum—we nurture curiosity, compassion, and creativity. The 3C approach—**Character, Competence,**

and Content—is seamlessly woven into the English classroom, where every reading becomes a reflection, every writing task a window into the self.

One of the most profound moments I experienced this year was during a JAM (Just a Minute) session. A student stood up and spoke passionately on the topic **“The Importance of Being Kind”**. He didn't share a personal story or a dramatic event—instead, he spoke with quiet conviction about how kindness doesn't cost anything, yet it holds the power to heal, connect, and uplift. He said, “Being kind is the easiest way to be remembered for the right reasons. People may forget what you said, but they won't forget how you made them feel.” In just sixty seconds, he reminded us all that kindness isn't a weakness—it's a strength. The class grew still, not because he demanded silence, but because his words held weight. That moment reminded me why we teach—not just to prepare children for exams, but to prepare them for life.

In today's digital age, where screens dominate and attention spans shrink, helping students find meaning in words becomes even more vital. The English classroom offers that rare opportunity to slow down, dive deep, and feel. We help students understand that words can hurt or heal, connect or divide, and that with the right intention, words can change the world.

Every debate we hold, every poem we recite, every journal we write is a small revolution—one that teaches our learners to express freely, think critically, and listen empathetically. We are not just teaching nouns and verbs—we are teaching voice, value, and vision.

As educators, our greatest achievement lies not in the marks our students score, but in the people they become. And when we teach language with love, patience, and purpose, we're not just building scholars—we're shaping storytellers, thinkers, and future changemakers.

So, let us continue to teach the heart through language. Because in the end, it's not the answers they memorise that will matter—it's the words they choose to speak, and the lives they choose to touch.

“Wearing the Badge, Carrying the Weight”

stood there-freshly adorned with a sash, a badge gleaming over my heart-feeling both honoured and humbled. Our Investiture Ceremony had ended, but for me, a new journey had just begun.

In that moment, I realised that this wasn't merely a title-it was trust placed on my shoulders. Not just the trust of teachers and mentors, but the silent expectations of every student who looked on, hoping to be heard, supported, and led with sincerity.

“If your actions inspire others to dream more, learn more, do more and become more, you are a leader.”

– John Quincy Adams

These words aren't just a quote-they've become a compass. Because true leadership isn't about standing at the front of the line-it's about standing for something. It's not about speaking the loudest-but listening the closest.

Since that day, the corridors feel a little different. I walk slower, observe more, and listen more deeply. I notice the quiet student who struggles to raise their hand, the one who eats alone during lunch, and the classmate whose eyes search for encouragement, not applause.

Leadership, I've come to understand, is about presence-not presence in authority, but presence in care. It's about creating a space where others feel safe, seen, and supported. It's knowing when to speak up, and when to simply stand beside someone in silence.

At Edify World School Shamshabad, we are taught that values matter more than visibility. Our Principal Ma'am often reminds us that leadership is not about power-it's about purpose. It's not reserved for the select few, but embedded in all of us.

The Investiture Ceremony was a celebration. But what followed was a quiet call to action-a commitment to lead with integrity, grace, and unwavering empathy.

To all my fellow students: You don't need a badge to lead. You lead when you uplift someone, when you speak up for what's right, when you treat others with compassion even when no one is watching.

This badge may rest over my heart, but it speaks for all of us. It is a symbol not of superiority-but of service. And I wear it every day with pride, humility, and an unshakable promise to be worthy of the trust placed in me.

The stage may be empty now, but the path ahead is full-and I am ready to walk it.

Mentor Speak

Uma Sampath Kumar
English Facilitator
Edify School, Tirupati

Greetings Everyone ! I am Uma Sampath Kumar from English Department . I having been a part of Edify School for the past five years, I can confidently say it has been an incredibly rewarding journey. The structured planning, well-defined schedules, and supportive leadership ensure that academics run smoothly, without any unnecessary stress or hustle.

What truly sets this institution apart is its unwavering commitment to professional growth. I've been given ample opportunities to enhance my skills, explore innovative teaching methods, and push my boundaries — all of which have significantly contributed to my development as an educator. The work environment is positive, collaborative, and deeply respectful of teachers. It feels truly privileged to work in an organization that not only values its educators but also celebrates their efforts and

achievements.

Edify School nurtures both students and teachers alike, fostering a culture of excellence, encouragement, and continuous learning. I feel proud and grateful to be part of such an esteemed and forward-thinking institution.

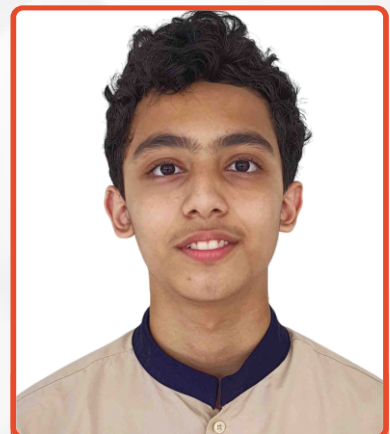

Mentee Speak

"I am extremely proud to be an Edifier! Completing my Grade X at Edify School Tirupati has been an incredible journey.

The academic support I received from the dedicated teachers played a vital role in my success. The concepts were taught with clarity, care, and consistent encouragement.

Not only academics, but the administrative support extended to my parents throughout the academic year was equally commendable. Timely communication, structured planning, and the school's overall environment made learning seamless and stress-free. I thank the school management, teachers, and staff for shaping my future and helping me reach this milestone with confidence and pride."

Sai Harsh Gumma
Grade X Topper
Edify School, Tirupati

Message from Chairperson, Edify School, Chhatarpur

As a proud stakeholder and Director of Edify School Chhatarpur, I feel immense joy and gratitude to be associated with an institution that is redefining the standards of quality education in our region. Our journey with the Edify School franchise has been deeply rewarding — not just as educators, but as changemakers committed to nurturing the leaders of tomorrow.

Choosing Edify School as our franchise partner was a decision rooted in our shared vision of holistic education. The 3C Curriculum, emphasis on inquiry-based learning, and integration of global best practices have empowered us to create a vibrant and inclusive learning environment where every child is valued and inspired to reach their full potential.

Over the years, we have witnessed remarkable growth — not only in terms of infrastructure and enrolment but more importantly, in the confidence and capabilities of our students. Edify's consistent academic support, training modules, and innovative teaching methodologies have played a pivotal role in shaping the success story of our school.

As we look ahead, we remain committed to upholding the ethos of the Edify brand — a name that stands for excellence, integrity, and futuristic education. We believe that with continued collaboration and shared purpose, we will keep building a generation of curious, compassionate, and competent individuals.

Together, let us continue to make learning joyful, meaningful, and transformational.

Ms. Shikha Verma
Director
Edify School
Chhatarpur

Message from Chairperson, Edify School, Chhindwara

Dear Educators,

Edify School Chhindwara is emerging as one of the leading **CBSE** school in the region. Established in 2017 under the guidance of MDN Edify Education, it is now a full fledged K-12 school offering diverse streams to the students in grades XI and XII.

We emphasize and believe in laying a strong foundation for our students in both curricular and co-curricular activities. Our focus is on development of innate talents of students, providing them with an environment that is supportive and safe. The school is some distance away from the main city making it a quiet and peaceful place for students to study, learn and grow to their full potential. With a team of qualified faculty members, the school is making its presence felt at Chhindwara. With over 3000 people in attendance at the Annual Function, it is testimony to the fact that the school is recognized for its programs and achievements. Our students have moved ahead after completing their school education and joined esteemed organizations which include the IITs, **MBBS, IT professionals, Bankers etc. & also one talent is in junior women's cricket team of India.**

There is much to achieve still and under the mentorship of MDN Edify Education, the school is all set to be the leader in education at Chhindwara.

We value our partnership and together we hope to reach many more milestones in the session 2025-2026. My good wishes to all Edify Schools as together we move forward and make an impact on the society at large.

Dr. Sumit Sahu
Director - Principal
Edify School
Chhindwara

Message from Chairman, Edify World School, Bileshivale

Message from the Chairman

"Education is the foundation upon which the future of our children, our community, and our world is built. "

As I stand here today, I am filled with pride and purpose, reflecting on the journey that has brought us to this moment. The establishment of EDIFY WORLD SCHOOL, BILESHIVALE is a dream realized, born out of a passion for education and a commitment to empowering young minds. We believe that education is the cornerstone of personal and societal growth.

To our students, I offer these words of encouragement:

- Dream big, and never lose sight of your aspirations.
- Embrace challenges as opportunities for growth.
- Cultivate empathy, kindness, and compassion in all that you do.
- Remember that your education is a gift, and use it to make a positive impact.

To our parents, I assure you that we share your commitment to providing the best possible education for your child. We value your partnership and look forward to working together to shape the future of our children.

As we embark on this journey together, I am filled with hope and optimism. I believe that EDIFY WORLD SCHOOL, BILESHIVALE will become a beacon of excellence, inspiring generations to come.

Mrs. Gayathri Manoj
Chairman,
Edify World School
Bileshivale

MDN Edify Education is proud to announce tie-ups with various academies to enrich our curriculum. It is recommended that schools utilize this opportunity to spruce up their curriculum. Reach out to HO for any help or clarification.

THE BETTEA LIFE PROJECTS

NEW TIE UP ANNOUNCEMENT

THE BETTER LIFE PROJECTS + **Edify EDUCATION**
LEADING YOUNG INDIA

The Better Life Projects is a pioneering organisation focused on fostering comprehensive growth in children through creative journal writing initiatives integrated into school curriculums. Our approach bridges the gap between emotional well-being, cognitive development, and personality enhancement. Our flagship programme, MINUTES FOR CHANGE, seamlessly integrates into classroom activities. Our resources focus on personal growth, empathy, gratitude, and self-reflection, laying the foundation for a well-rounded individuals of the future.

VISION

To foster a generation of emotionally intelligent students who embrace life-long learning

MISSION

Integrate Mental Health Wellbeing and Personality Development into mainstream education

PHILOSOPHY

Student Mental Health is a Priority, not a Propaganda.

Per Student Rs 1000/-

KEY FEATURES:

1. CBSE/ICSE/ISC/IGCSE/IB mapped journal design - age & grade appropriate journals
2. 25000+ students use our journals to hold thoughtful conversations with themselves in an unaltered voice
3. Affordable annual packages - INR 900-1000/academic year/student
4. Extensive Teachers' Training, Seminars, bi-monthly feedback sessions, comprehensive lesson plans for each activity, etc

THE BETTER LIFE PROJECTS BECAUSE:

1. Early-Development frameworks - Our journals, are based on Bloom's Taxonomy making them one of a kind Mental Health Wellbeing programme in India
2. Teacher & Parent support systems - Repository and feedback tools for collaborative discussion and tracking of student progress
3. Skill-based Activities - Creative outlets such as art, empathy building, writing exercises tailored to individual strenghts

DIGITAL

AAKASH DIGITAL - SCHOOL INTEGRATED PROGRAM

Aakash Digital (School Integrated Program): Live Online Classroom Program

Aakash Digital-SIP is an extended Classroom Courses designed to provide higher-order subject-matter exposure to students, delivered by National-level faculty over Live classroom Mode. The program aims to impart an integrated learning, spanning "Boards" & "Competition" preparation. The program is delivered using state-of-the-art, two-way interactive internet technology which offers the added advantage of review & revision.

| | |
|---|--|
|  | State-of-the-art studios & telecommunication facilities. The Classroom will channelize audio, video and data-enabled high-quality, faculty lectures to students of Class 8-12 (Medical & Engineering). |
|  | Aakash Digital faculty uses smart audio-video facilities to see, hear and talk to the students. |
|  | The students can see, listen and participate in a lecture and interact with the faculty spontaneously and naturally as in a regular classroom. |
|  | They can also raise queries, respond to polls, attempt multiple choice questions and assessments & mark attendance. |
|  | The classes are delivered through a unique AV setup using high-definition projection system and high-resolution reverse feed camera. |
|  | All sessions conducted are recorded and are available to the students on request. |
|  | MyAakash App facility for online tests. |

Designed for the Students of

| | |
|---|--|
| Class 8 and 10 Preparing for Olympiad, NTSE, Other Competitive & Board Exams. | Class 11 and 12 Preparing for NEET / JEE (Main & Advanced) & Board Exams |
|---|--|

STEAM

QTPI - LEARNING THROUGH CREATING

New Tie up Announcement

We are over joyed to inform you that we are tie up with QTPI 'Learning through creating' is ageless. Today, it's about learning to be analytical and logical by creating through coding and robotics.

Welcome to the world of QTPI Robotics. What you will find in here is everything you need to expand your imagination and develop special skills in building unique robotic projects, that's not just educational but recreational as well.

| City/Region | Address | Phone No. | Website |
|-------------|--|--------------|------------------------|
| Delhi | Plot No. 10, Sector 10, Connaught Place, New Delhi | 011-26101111 | www.edifyeducation.com |
| Mumbai | Plot No. 10, Sector 10, Connaught Place, New Delhi | 022-26101111 | www.edifyeducation.com |

Importance of external tie-ups for the school for overall development of the child

External tie-ups play a crucial role in the overall development of a child by bridging the gap between academic learning and real-world experiences. When schools collaborate with external organizations such as universities, industries, cultural institutions, and sports academies, they open a wide array of opportunities for students to learn beyond textbooks. These partnerships expose children to diverse fields such as science, technology, arts, sports, and entrepreneurship, helping them discover their interests and talents early on. Workshops, internships, guest lectures, educational trips, and hands-on projects offered through such tie-ups enhance critical thinking, creativity, and practical skills among students. Moreover, they foster essential life skills like communication, collaboration, and problem-solving, which are vital for success in the 21st century.

External collaborations also bring global perspectives into classrooms, encouraging cultural exchange and awareness among students, making them more empathetic and socially responsible citizens. Tie-ups with technology companies, for instance, ensure that students are equipped with the latest digital skills, preparing them for future careers. Similarly, partnerships with sports academies and wellness organizations emphasize physical fitness, mental health, and overall well-being, promoting a balanced development. For students aiming for higher education, connections with reputed universities and research institutions provide mentorship opportunities and enhance their academic profiles.

Importantly, such partnerships inspire innovation in teaching practices too, as educators receive exposure to global methodologies and can integrate fresh ideas into their classrooms. This dynamic learning environment nurtures curiosity, adaptability, and resilience among students. In today's fast-changing world, where knowledge alone is not enough, external tie-ups ensure that students are holistically prepared—academically, socially, emotionally, and physically—for the challenges of the future. Thus, strategic collaborations are not just add-ons but essential components for creating well-rounded individuals who can thrive in an interconnected and competitive world.

Message from Principal, Edify World School, Whitefield

One day One skill

We are living in an era which is marked by rapid changes and advancement. This is often referred to as the Fourth Industrial Revolution which involves AI, Robots and automation. Today's students are at the heart of this change, and it is essential that they understand the evolving nature of the world around them—particularly in the field of education. As the generation we call Gen alpha our students cannot afford to be unaware of AI and its growing influence in every field. However, with great power comes great responsibility. While AI offers enormous potential, it should not replace student's creativity, teacher's imagination, or academic integrity. We must ensure that it is used ethically and thoughtfully—avoiding plagiarism or overreliance on automated tools. As educators, it is our duty to guide students in using AI effectively, helping them enhance their learning and develop valuable new skills. My advice to the teaching-learning community is simple: instead of spending hours on social media, invest time each day in learning one AI-related skill. Let us set a target like this. AI should be viewed as a tool to support and enrich human capabilities. Let us strive to master AI and lead the way into a future where technology supports—not replaces—our potential. After all the invention of the calculator did not make arithmetic obsolete!!!

Dr. Madhumita Roychowdhury
Principal
Edify World School
Whitefield

Message from Vice Principal, Edify School, Chikkabanavara

Artificial Intelligence and Its Impact on the Mental Health of Children

The impact of Artificial Intelligence (AI) on the mental health of children is a growing concern and area of research. It presents both opportunities and challenges, depending on how AI is integrated into children's daily lives, education, and social environments.

1. Cognitive and Social Developmental Concerns

Issue: Limited interpersonal interaction due to AI overuse may hinder social learning and mind development in stages of growth.

Resolution:

- Structured socialization opportunities: Integrate group-based activities (e.g., peer learning, storytelling circles) to promote real human interaction.
- Parental modeling and mediation: Parents should co-view media with their children, discussing content, explaining real vs artificial social behavior.

Masuma Nihal Syed
Vice Principal
Edify School
Chikkabanavara

- Educational balance: Blending AI tools with human-led learning environments that encourage empathy, dialogue, and perspective-taking.

2. Emotional Development and AI Companionship

Issue: Over-attachment to AI-based chatbots may impact secure attachment development and emotional regulation.

Resolution:

- Emotion coaching: Parents and educators to use emotional coaching strategies to foster secure attachments.
- Therapeutic role-play: Using play therapy and guided storytelling to help children differentiate between artificial and human relationships.
- Prioritize Quality Time: Encourage activities that foster face-to-face interaction, such as playing, reading, and engaging in conversations, especially for children under 8.

3. Screen Time and Attention

Issue: Prolonged interaction with AI-integrated devices increases screen time, which numerous studies have linked with increased incidence of anxiety, depression, and reducing attention span in children.

Resolution:

- Set Screen Time Limits: Establish daily or weekly limits for screen time and enforce curfews, such as avoiding screens one hour before bedtime.
- Create Tech-Free Zones: Designate specific areas or times, like during meals or one night a week, as screen-free zones to encourage face-to-face interactions and mindful engagement with the present moment.
- Be Mindful of Digital Consumption: Manage news intake, curate social media feeds, and limit notifications to reduce exposure to potentially triggering or overwhelming content.

AI, when responsibly used, can be a powerful ally in supporting children's mental health. However, unregulated exposure and misuse can pose serious psychological risks. The key lies in human-guided, ethically designed, and developmentally appropriate integration of AI into children's lives. Let's work together for our children to create a more balanced relationship with technology, promote better attention spans, and foster positive mental well-being.

Message from Director-Principal, Edify School, Amravati

The present century belongs to Gen Z, on contrary controlled by Ai. Yes, Artificial intelligence..is making our lives easy and smart. Every invention brings bliss and evil. Let us not forget it's the way and reason we utilise our creations;But one thing should never be overlooked... Artificial is artificial....fake and never Original. It's upto us, whether we should appreciate fake... artificial or original, and soon the next generation will be forced to trust artificial as original ...it's now upto us...how to utilise our original intelligence...which needs to be protected....it's a warning to use Ai wisely.

Dr. Jacob Das
Director-Principal
Edify School, Amravati

Message from Principal, Edify World School, Kurnool

Artificial Intelligence in Education

Artificial intelligence (AI), also referred to as machine intelligence, is intelligence demonstrated by machines or computers. In its beginning stages AI was used to emulate complex functions associated with the human mind, such as sensing, learning, and predicting. Susan Knapp, in her book "Artificial Intelligence – Past, Present and Future" says that researching AI has been acknowledged as an academic discipline since 1956.

AI in education is a topic that educators and researchers are becoming increasingly interested in, since AI seems to make a significant contribution to education by personalizing learning experiences. From robotic instruction to the invention of an automated system for scoring answer sheets, for instance, AI has a role to play in facilitating teaching, learning, and assessment.

AI is reshaping most of the fields worldwide. On a daily basis, we witness the use of AI in different forms such as using ChatGPT, interacting with Alexa, watching AI-based reels on Instagram, playing AI-based educational games, welcoming the G20 delegates through AI-powered anchors and so much more. It has made its way into different fields such as healthcare, finance, transportation, and education. In the current scenario, AI is playing a key role in implementing and designing education.

What once seemed to be a far-fetched and impossible reality of our lives and classrooms is now front and centre. AI is increasingly used in early childhood education settings, in particular and to enhance learning opportunities for 21st century learners.

Samia Kazi, Middle East Regional Director for Childhood Education International, states, "We must get engaged and proactive on these topics immediately as educational artificial intelligence is just starting to take its first steps."

Mr. Joseph David
Principal
Edify World School
Kurnool

AI in the Classroom

Artificial Intelligence can be incorporated into just about any aspect of a classroom. While it can never replace traditional teaching, it can supplement quality instruction and lighten the teacher's load.

Teachers are expected to do a great deal of administrative tasks such as collecting data. AI gives teachers more time to devote to developing and delivering impactful lessons to their children.

AI plays a vital role in an inclusive classroom through assistive technology. Assistive technology is used by individuals with learning barriers and to support those learners who are differently abled, in order to perform functions that might otherwise be difficult or impossible. Similarly, AI can make education more accessible to children with exceptional academic, physical, and emotional needs.

AI, moreover, helps in scaffolding learning by providing differentiated learning opportunities through interactive games that teach basic academic skills while tracking vital data to help inform instruction.

Language could be a barrier to learning. Children who speak a different language can use AI to translate content, allowing for more accessible communication.

Imagine your learners entering the classroom and playing a simple numeracy or literacy related game testing their academic skills. They might think it's just a fun activity, but in reality, the system is tracking their understanding of essential reading and math concepts. You can then take the data from the activity and use it as a starting point to tailor-make your instruction. Since you aren't individually working with each child to learn their academic level, you're free to work on other tasks while they're on the computer, tablet, or another device. Once your children play this game, you'll have a general understanding of their skill level in various areas. You can then quickly adjust your instruction to meet them where they are.

Personalized learning using AI

A major benefit of using artificial intelligence is that it allows for more personalized learning. As educators, we know the importance of shaping instruction to how children learn, but it can be challenging depending on our classroom makeup. Some children catch on to new concepts quicker than others. One child might learn better visually, while another can only grasp a concept using kinesthetic activities. Meeting each child where they are can be challenging, but AI helps to close the gap.

That's the beauty of AI! The more you understand your children, the better you can shape your lessons to fit their needs. Artificial intelligence can never replace teachers, but it can enhance instruction by helping you better serve your children.

Joseph David,

Principal, Edify World School, Kurnool.

Message from Principal, Edify International School, Kalaburagi

Empowering Young Minds with the Future of AI Education

At Edify International School, Kalaburagi, we are proud to be at the forefront of educational innovation through our pioneering Artificial Intelligence (AI) education program. Our vision is to nurture future-ready learners by introducing them to the exciting and transformative world of AI from an early age.

Through engaging hands-on projects, real-world applications, and interactive coding experiences, our students are encouraged to think critically, solve complex problems creatively, and drive innovation. This not only builds their technical proficiency but also instills confidence and curiosity—qualities essential for lifelong success.

Preparing Future Innovators and Leaders

At Edify, we are committed to equipping our learners with the knowledge, skills, and mindset to thrive in a rapidly evolving, AI-powered world. Our AI curriculum lays a strong foundation for emerging careers and empowers students to become thought leaders, changemakers, and innovators of tomorrow.

Join us in redefining education and shaping the future—today.

Artificial Intelligence: Transforming Learning at Edify World School, Firozabad

At Edify World School, Firozabad, we are embracing the future of education by integrating Artificial Intelligence (AI) into our teaching and learning processes. Once considered a futuristic concept, AI is now a powerful tool reshaping how students learn and how teachers teach. Since its recognition as a scientific field in 1956, AI has advanced to replicate core human abilities like analyzing, predicting, and decision-making. In our classrooms, AI supports both students and educators by enabling intelligent, learner-centered experiences. From reducing time spent on repetitive administrative work to providing adaptive learning paths for students, AI allows our teachers to focus on delivering impactful lessons. It is particularly effective in inclusive education—helping differently-abled students access learning through assistive technologies and interactive platforms.

AI-powered tools like learning games and diagnostic platforms track student understanding in real time, offering data that helps teachers personalize instruction with precision. It also breaks language barriers by translating content, making learning accessible to all.

Mr. Manu Antony
Principal
Edify International
School, Kalaburagi

Mr. Sandeep Singh
Principal
Edify World School
Firozabad

The most significant benefit of AI at Edify Firozabad is personalized education. Each child learns differently, and AI helps bridge these gaps by adapting to varied learning styles and paces. Whether a student learns visually, through hands-on activities, or at an accelerated pace, AI helps educators cater to their unique needs.

While AI cannot replace our passionate educators, it strengthens and complements their role—empowering them to guide, mentor, and inspire students more effectively.

At Edify World School, Firozabad, we're not just teaching for today—we're preparing learners for tomorrow's world.

Message from Principal, Edify School, Kanakapura Road

AI in Education: Classrooms' Silent Revolution

Education is being subtly changed by artificial intelligence (AI), which is changing how teachers and students learn. No longer just a tech buzzword, AI has evolved into a classroom ally—offering personalized learning paths, intelligent tutoring systems, and smart content creation. These tools automate grading, customize training to meet the needs of each individual student, and establish accessible learning environments for a range of learners. In India, platforms like ConveGenius are using AI to deliver adaptive learning in regional languages, reaching underserved communities and improving foundational literacy and numeracy.

Principal
Edify School
Kanakapura Road

AI in Education: Using Empathy and Intelligence to Reimagine Learning

Artificial Intelligence (AI) is no longer a sci-fi fantasy; rather, it is a force that is subtly changing curricula, classrooms, and the essence of education. AI is assisting educators in moving past one-size-fits-all methods, from intelligent systems that promote inclusive education to adaptive platforms that customize instruction. AI is already being used in India via platforms such as ConveGenius and Imbibe to provide data-driven, regionally customized learning experiences to students from a variety of socioeconomic backgrounds,

demonstrating that innovation can be both equitable and scalable. However, the real promise of AI is not efficiency or automation, but rather the expansion of human potential. AI tools can be used by educators to create lesson plans, evaluate student progress, and spot learning gaps instantly. Students gain from emotionally responsive interfaces that adjust to their pace and learning preferences, multilingual support, and round-the-clock teaching. For instance, Gradescope lets teachers assess assignments more quickly and reliably, and Microsoft's Seeing AI allows visually challenged students to access classroom content through image-to-speech conversion.

However, ethical foresight, inclusive design, and teacher empowerment are necessary for meaningful AI integration, which calls for more than just enthusiasm. Unfair access, algorithmic bias, and data privacy are still major issues. We must make investments in professional development, create culturally sensitive tools, and make sure that technology enhances rather than replaces the empathy, inventiveness, and mentoring that only human educators can provide if we are to fully realize AI's potential. AI in education aims to create wiser systems that treat each student with respect and purpose, not just smarter computers.

Message from Principal, Edify World School, Shamshabad

AI, or Artificial Intelligence, is a branch of computer science that focuses on creating machines that can think, learn, and solve problems like humans. It enables computers to perform tasks that usually require human intelligence - such as understanding language, recognizing images, making decisions, and learning from experience.

The rise of AI in education has sparked an important debate: Will AI replace teachers?

The answer is - AI may change the way education is delivered, but it cannot replace the human touch that lies at the heart of teaching. The future of education lies in a balanced partnership - where technology supports, and teachers lead.

AI probably will be able to grade papers, provide instant feedback, personalize learning paths, and even tutor students in certain subjects at their own speed and need. These capabilities enhance the efficiency of education and support learners in ways that were previously impossible.

However, teaching is not just about delivering content - it is about inspiring, guiding, and emotionally connecting with students. A teacher understands the emotional needs of a child, nurtures curiosity, fosters critical thinking, and builds character. These human elements - empathy, motivation, encouragement, and mentorship - cannot be replicated by algorithms.

The future of education lies in collaboration, not competition. AI should be seen as a powerful tool that assists teachers, not replaces them. By handling administrative tasks and offering learning insights, AI can free up teachers' time for what they do best - building relationships and inspiring the next generation.

AI has tremendous potential to make education more adaptive, inclusive, and future-ready. However, its integration must be carried out thoughtfully. Ensuring data privacy, ethical use, and proper teacher training is essential to guarantee that technology enhances-rather than replaces-the human touch in teaching.

While AI may transform the role of educators, it can never take their place entirely. The most impactful learning will emerge from a synergy between human intelligence and artificial intelligence, blending the strengths of both to create deeper, more meaningful educational experiences.

Message from Principal, Edify World School, Balapur

In today's rapidly evolving world, education must keep pace with innovation to remain relevant and impactful. One of the most transformative forces shaping modern classrooms is Artificial Intelligence (AI). From personalized learning platforms to smart assessments, AI is not only changing what we teach but also how we teach.

Current educational trends increasingly revolve around adaptive learning systems, where AI tailors content to suit individual learning styles and progress levels. AI-powered chatbots and virtual tutors are offering instant academic support, while automated assessment tools are helping educators focus more on teaching than grading. Data-driven insights are enabling schools to identify learning gaps early and intervene effectively.

Inclusion of AI also means bringing in assistive technologies that support children with diverse learning needs - voice-to-text tools, real-time translation, and predictive text applications are opening doors to inclusive learning environments.

However, embracing AI comes with the need for digital awareness and ethical understanding. At Edify World School Balapur, we believe that while technology can assist, it is the human values of empathy, collaboration, and integrity that must guide its use. Therefore, we aim to equip our students with not just technological skills, but also the wisdom to use them responsibly.

Let us foster a generation that doesn't just consume technology but understands, questions, and innovates with it - shaping a future where education is more inclusive, personalized, and empowering for all.

AI Technology in Education

"The purpose of artificial intelligence is to re-engineer the human mind and tailor skills and content to meet individual students' needs."

Technology plays a vital role in transforming education, especially through the use of Artificial Intelligence (AI). The potential benefits are vast. AI fosters creativity and innovation among students, opening new possibilities for both educators and learners. It holds the power to revolutionize the way we learn-bringing text and content to life.

The future belongs to those who can harness the power of AI while preserving the wisdom, creativity, and compassion that define our humanity. Our role as educators is to prepare students for this future-not by choosing between human and artificial intelligence-but by teaching them to excel at both. When we embrace AI thoughtfully and purposefully, we do not diminish the role of educators-we enhance it.

Inclusion and Understanding of AI in Education

In recent years, Artificial Intelligence-or AI-has quietly stepped into the world of education, changing the way we learn, teach, and even think. What was once a concept of the future has now become an everyday companion in the classroom, blending seamlessly into apps, platforms, and learning tools. But as AI grows more powerful, it becomes essential that we not only use it but also understand and include it thoughtfully in our educational journey.

"Technology will not replace great teachers, but technology in the hands of great teachers can be transformational." - George Couros

At its core, AI is the ability of machines to mimic human intelligence-learning from data, recognizing patterns, and making decisions. In education, this means AI can assist in everything from explaining complex topics to tailoring lessons according to a student's learning pace. Many of us have already used AI-driven apps that suggest questions based on our answers or help us revise better before exams. This kind of smart learning allows each student to feel seen and supported in ways that traditional systems may not always manage.

However, the true power of AI lies not just in its capabilities, but in how inclusively it is adopted. As students from different backgrounds and regions interact with this technology, it is important to ensure equal access. No student should be left behind simply because they do not have the tools or infrastructure. Inclusion in AI means providing resources, training, and awareness so that every learner-regardless of where they come from-can benefit equally.

Moreover, understanding AI is as important as using it. Just like we study science or math to understand the world around us, learning the basics of AI helps us make sense of the digital world we're growing up in. It teaches us how to use technology wisely, ask the right questions, and think critically about the information we receive.

"Artificial Intelligence is not the future of education-it is the present that is shaping the future."

As we move forward, AI will continue to evolve and influence education in ways we can't fully imagine yet. But one thing is clear: the future of learning will not just depend on machines-it will depend on how well we include, understand, and guide their use. With curiosity, responsibility, and compassion, we can ensure that AI becomes a tool that empowers all, not just a few.

Education is no longer just about books and blackboards. It is about preparing students for a world where technology and human values go hand in hand. And that journey begins with understanding and inclusion-of ideas, of innovations, and of each other.

"In the age of AI, the most powerful skill is not just learning how to use machines, but learning how to stay human."

25 Exit Ticket Ideas and Examples for Instant Student Feedback

Experienced educators understand that an effective classroom thrives on interaction and reflection, not just lectures. Continuous feedback helps teachers adapt their methods and meet learners where they are. That's where exit tickets come in—simple yet powerful tools that offer real-time insight into student understanding. Whether you're teaching in person or online, these strategies can make learning more responsive and meaningful.

What Are Exit Tickets?

Exit tickets are short responses written by students at the end of a lesson or class session. These responses are typically based on questions posed by the teacher, and they serve as quick formative assessments. In addition to gauging content mastery, exit tickets also allow teachers to understand students' perceptions, emotions, and engagement.

Why Use Exit Tickets?

- **Guide Instruction**

Exit tickets highlight who has grasped the concept, who's nearly there, and who needs more support. They also reveal common misconceptions, enabling you to tailor your next steps whether it's reteaching, group work, or one-on-one help.

- **Amplify Student Voice**

They give all students, especially quieter ones, a platform to share their thoughts and feelings without the pressure of speaking up in front of the class.

- **Build Metacognition**

Exit tickets encourage students to think about their own thinking how they're learning, how they feel about the material, and whether their needs are being met in the classroom.

Tips for Creating Effective Exit Tickets

- **Align with Objectives:** Make sure the questions reflect the learning goals and success criteria of the lesson.
- **Be Clear and Concise:** The question should be specific and take no more than 5 minutes to answer.
- **Keep It Simple:** Use accessible formats and provide clear instructions on how and where to submit the exit ticket.
- **Mix It Up:** Use a range of question types—multiple choice, short answer, illustrations, or reflective prompts.
- **Get Creative:** Don't be afraid to use visuals, movement, or multimedia formats to keep students engaged.

25 Exit Ticket Ideas You Can Use Today

1. What Stuck with You Today?

Ask students to write one thing that stood out most in the lesson. Sticky notes work great for this, and yes you can even print on them to save prep time.

2. Brain Dump:

Invite students to write down everything they remember from the lesson facts, terms, or key ideas. Great for seeing what was retained naturally.

3. Emoji Check-In

Use emojis to gauge understanding and mood. Ask students to circle one and explain why it represents how they feel about the topic.

4. Key Takeaway Snapshot

Have students draw a visual summary on the front of a card and write a sentence explaining the main point on the back.

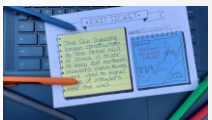

5. Draw It Out

Instead of writing, ask students to illustrate what they learned, how they feel, or how they would explain the concept to someone else.

6. Write + Draw Combo

Provide space for both drawing and writing so students can express ideas through multiple modes.

7. Traffic Light Reflection

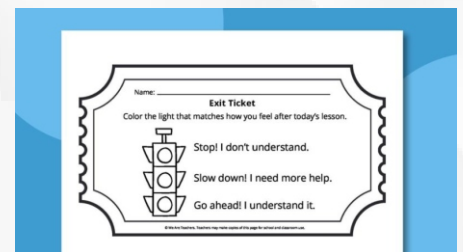

Students color a traffic light:

Red = I need help

Yellow = I'm close

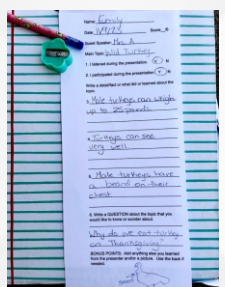

Green = I understand

Ideal for early learners or ELL students.

8. Post-Presentation Recap

After a video or guest speaker, ask students to rate their engagement, list three key points, and write one follow-up question.

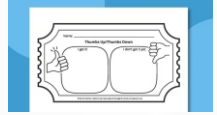

9. “Post-It, Prove It” Challenge

Give students a problem to solve or a question to answer, and have them stick their solution on the board for review.

10. Quick Polls

Use tools like Poll Everywhere or Google Forms to collect instant responses digitally.

11. Thumbs Up / Down / Sideways

Ask for a quick visual check-in on how well they understood the day's topic.

12. Padlet Reflections

Have students post a response on Padlet an interactive digital board so you can review all feedback in one place.

13. Three Key Points

Ask students to write three major things they learned. Short, simple, and effective.

14. Self-Reflection Slip

Let students identify what they did well and where they need improvement. Helps build metacognition and ownership.

15. Two Truths and a Lie

Students write two true facts and one false statement about the lesson. Classmates guess which is false before handing it in.

16. Exit Ticket Journals

Use notebooks for ongoing reflections. Great for long-term review and student portfolios.

17. Mini-Assessment

Design a low-stakes quiz or comprehension check at the end of a lesson. Students give their best shot no pressure, just insight.

18. Google Form Submissions

Paperless and easy to organize. Create a form that aligns with your lesson's objectives for a quick digital exit ticket.

19. 3-2-1 Method

Students write:

- 3 things they learned
- 2 things they're still curious about
- 1 question they still have

20. One-Sentence Summary

Challenge students to condense the whole lesson into a single sentence.

21. Peer Teaching Tip

Ask students to write one piece of advice that could help a classmate who's struggling with today's topic.

22. Video Responses

Allow students to record short video reflections. Great for online or blended learning models.

23. Mid-Day Check-In

Don't wait till the end of the day—use verbal or written check-ins before lunch or recess for quick insights.

24. Verbal Exit for Young Learners

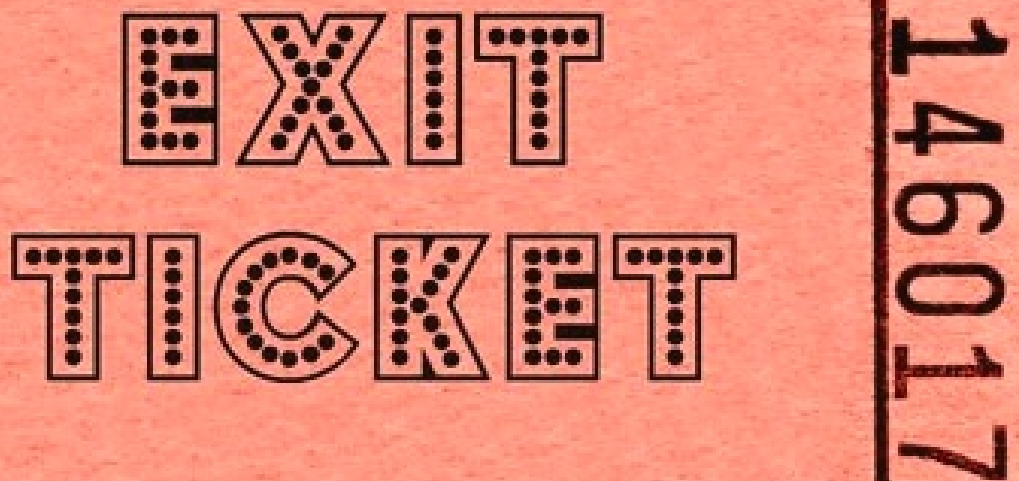

If students can't write yet, ask them to tell you what they learned or how they felt as they line up or pack up.

25. Review and Act on Exit Data

Use responses to guide your next steps. Re-teach a tricky topic, group students for support, or confer individually to address learning gaps.

Final Thought

Exit tickets may be simple, but they're one of the most powerful ways to stay tuned into your students' minds and hearts. When used consistently and thoughtfully, they can transform your classroom into a more reflective, responsive, and student-centered space.

3C PROFILES

EMPATHETIC

One who identifies and understands the feelings and difficulties of others and is always willing to support them.

3C PROFILES

CARING

One who shows concern and compassion for others and takes steps to help them in their needs.

3C PROFILES

PRINCIPLED

One who acts with integrity and honesty and possesses a strong sense of fairness, justice and respect for the dignity of individuals, groups and communities.

3C PROFILES

REFLECTIVE

One who gives thoughtful consideration to one's own learning and experience.

3C PROFILES

INQUIRING

One who shows natural curiosity and is keen to acquire skills necessary to conduct inquiry and research independently.

3C PROFILES

INTEGRITY

One who adheres to moral and ethical principles diligently so as to act with honesty.

3C PROFILES

BALANCED

One who understands the importance of intellectual, physical and emotional balance to achieve personal well-being.

3C PROFILES

COMMUNICATIVE

One who is able to communicate ideas and perspectives clearly and precisely.

3C PROFILES

DECISIVE

One who is able to make logical and clear decisions while working through issues and problems.

3C PROFILES

CREATIVE

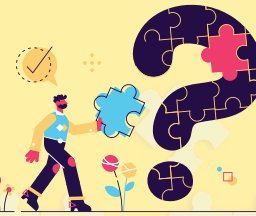

One who is able to create and display novel ideas resulting from originality of thought.

3C PROFILES

PROBLEM SOLVER

One who is able to understand problems and provide effective solutions, thus displaying critical thinking and analytical skills.

3C PROFILES

ENTREPRENEURIAL

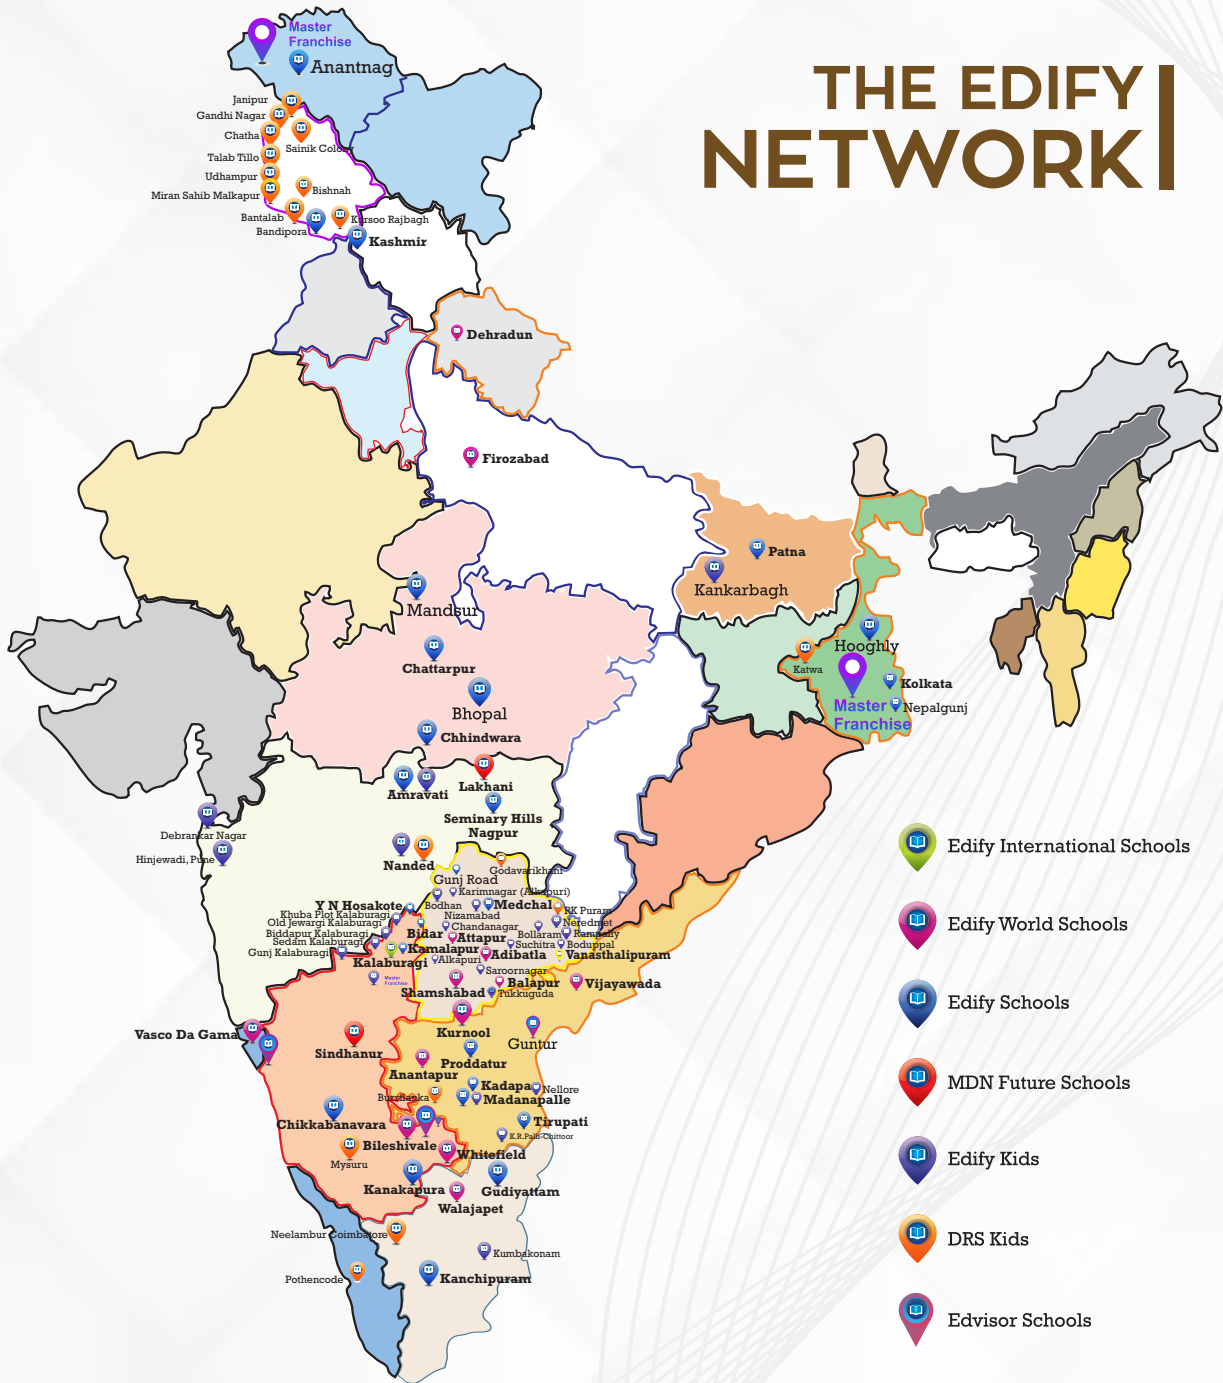

One who initiates new and smart strategies for events and implements them successfully.
